DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fourth plate lying immediately adjacent the third plate in the recess must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Specification

2. The disclosure includes the following informalities: in claim 7, line 3, "removable" should be changed to --removably--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4-6 and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 4 and claim 10, line 4, respectively, it is unclear how the fourth plate lies immediately adjacent the third plate in the recess.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3727

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mehls.

Mehls discloses a vehicle hitch supported cargo carrier mechanism comprising:

- an adapter (28) connecting the hitch to a vehicle
- a base member (24) comprising an upright element
- a platform (16)
- a connector (23) linked to the platform; and
- locking means (34) for fixing the rotating movement of the connector and linked platform.

Regarding claim 2, the upright member comprises a first and second plate (Figure 4).

Regarding claim 3, the base member further includes a first stop (34) preventing rotation of the platform in one direction of rotation and a second stop (34) for preventing rotation in another direction (Column 5, lines 1-16).

7. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Zahn et al.

Zahn discloses a vehicle hitch supported cargo carrier mechanism comprising:

- an adapter (17) connecting the hitch to a vehicle
- a base member (18) comprising an upright element
- a platform (21)
- a connector (26) linked to the platform; and
- locking means (39) for fixing the rotating movement of the connector and linked platform.

Regarding claim 7, the platform further comprises at least one post (71) extending outwardly therefrom, the post being removably held to the platform.

Art Unit: 3727

Allowable Subject Matter

8. Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 4-6 and 10- 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller is cited for a cargo carrying system with a platform.
